-  15, MGP, 3rd North Street, Pettai, Tvl - 627004

SUMMARY

Results-driven MERN Stack Developer with 2.5 years of hands-on experience in designing, developing, and maintaining full-stack web applications using MongoDB, Express.js, React.js, Vue.js, WordPress and Node.js. Skilled in building scalable RESTful APIs, dynamic user interfaces, and integrating third-party services. Proficient in JavaScript (ES6+), responsive design, and Git version control.

SKILLS

PERSONEL SKILLS

- Effective Communication
- Adapdability
- Leadership
- Creativity
- Time Management
- Interpersonal Skills
- Problem Solving

CODING SKILLS

- React-JS, Next-JS
- Redux
- Vue-JS
- Vuex
- Express-JS
- Node- JS
- JavaScript, JQuery
- WordPress
- SCSS
- Tailwind, Bootstrap, CSS
- HTML
- GIT Version Control
- Front-End Optimization
- MongoDB
- PostegreSQL

EDUCATION

- **BACHELOR OF ENGINEERING**
Infant Jesus College of Engineering
2012 - 2016
- **HIGHER SECONDARY**
St.Xavier Matric Hr.Sec School
2010 - 2012

EXPERIENCE

- **Danam Infotech Private Limited** 2025 August - Present
 - Full-stack Developer (Next.js, PostgreSQL, Prisma) with hands-on experience building Hotel ERP systems, procurement modules, and advanced inventory valuation logic.
- **ITFlex Solution India pvt Ltd** 2023 June - 2025 June
 - Developed and maintained scalable full-stack applications using MongoDB, Express.js, React.js, and Node.js
 - Led end-to-end implementation of RESTful APIs and responsive user interfaces across web and mobile platforms
 - Optimized performance and security of applications while collaborating with cross-functional teams in agile environments
 - Optimized front-end performance by leveraging lazy loading, WebP image formats, code splitting, and minimizing render-blocking resources to improve PageSpeed and GTmetrix scores

PROFESSIONAL EXPERIENCE

SEVAI ERP

React, Next-JS, Material UI, PostgreSQL, Prisma, Azure DevOps, AWS

<http://52.66.149.71:5050>

Duration: 4 months

SevaAI is a hospitality management platform providing a complete ERP suite for hotels and restaurants, enabling automation of procurement, inventory, finance, and accounting processes.

- Designed and developed a full-scale Hotel ERP system including company, branch, and restaurant management modules to streamline multi-location operations.
- Built a robust Material Management System supporting multiple inventory valuation methods such as FIFO, LIFO, Standard Cost, and Moving Average Price, ensuring accurate stock and cost reporting.
- Implemented the complete Procurement Lifecycle including Purchase Requisition (PR), Purchase Order (PO), Goods Receipt (GR), and Invoice modules with configurable approval workflows.
- Developed secure approval mechanisms for PR and PO to manage role-based authorization in the procurement chain.
- Developed the Chart of Accounts module enabling users to create, manage, and categorize financial accounts following accounting standards.
- Built a fully functional Ledger Book Entry module allowing journal entries, debit/credit tracking, and real-time financial updates.
- Integrated the Material Management (MM) module with the ledger system—automatically updating relevant ledgers immediately after Goods Receipt (GR) entries.
- Developed the Bank Transaction Module with complete withdrawal and deposit workflows, ensuring accurate financial posting.
- Implemented a comprehensive Bank Module supporting creation and management of bank accounts with full transaction tracking.
- Developed the Bank Transaction Module with complete withdrawal and deposit workflows, ensuring accurate financial posting.
- Built the Cheque Entry and Reconciliation system, enabling cheque issuance, tracking, clearing status updates, and reconciliation against bank statements.
- Designed and implemented the Bank Ledger and Bank Reconciliation Ledger modules for accurate financial reporting and monthly reconciliation.

PROPVATOR

React, Next-JS, Tailwind CSS, WordPress, Vercel

<https://propvator.com>

Duration: 3 months

Propvator is an online platform that provides users with a list of various proprietary trading firms, aiming to educate users by sharing publicly available information sourced online. Our mission is to promote transparency, enabling users to make informed decisions when choosing a proprietary trading firm

- Developed a new offer page with a custom-designed, responsive table layout, integrating dynamic data using Next.js and React for enhanced performance and seamless interaction.

- Designed and implemented the home page based on Figma specifications, incorporating advanced gradient effects and animation features to deliver a visually engaging user experience.
- Ensured full responsiveness across all screen sizes, maintaining consistent design and usability on both desktop and mobile devices.
- Designed and developed the blog page using WordPress with dynamic post display functionality for streamlined content management.
- Implemented and customized styles using CSS, integrating the design through a custom CSS file within the child theme for maintainability and theme integrity.

FOTO-AGENTUR

Express-JS, Vue-JS, Bootstrap, CSS , MySQL

<https://meine.foto-agentur.de/app/ticket>

Duration: 1 month

Foto-agentur is a platform to showcase and sell a photographer's work, attract clients, and build a professional brand. It acts as a digital portfolio, allowing photographers to present their best images, connect with potential clients, and potentially sell prints or digital downloads

- Designed and implemented new database tables to efficiently store and retrieve user data for messaging functionality.
- Contributed to backend development, enabling seamless integration of the messaging system within the platform.
- Developed a real-time conversation interface between admins and users with a focus on intuitive and user-friendly UI design.
- Ensured full mobile responsiveness of the messaging system to maintain a consistent and accessible user experience across all devices.
- Implemented API endpoints and optimized database queries to ensure fast message delivery and retrieval with minimal latency.

GRUNDSCHULSHIRTS

React-JS, Tailwind CSS ,

<https://grundschulshirts.de/>

Duration: 4 month

Grundschulshirts is a custom T-shirt eCommerce platform enabling users to upload and order shirts with their preferred image prints

- Designed and implemented a fully responsive T-shirt customization page with image preview and variant selection for both front and back views.
- Integrated login authentication and real-time image fitting functionality for a seamless user experience.
- Collaborated with backend teams to enable email notifications with selected T-shirt designs and user details.
- Ensured cross-device compatibility with responsive UI design across mobile, tablet, and desktop platforms.

KORKHAI

Node, Express-JS, MongoDB , React-JS, Bootstrap

Duration: 5 month

Korkhaii is a cryptocurrency platform enabling users to trade, deposit, withdraw, and purchase commission-based plans on daily, weekly, monthly, and yearly cycles

- Developed the application from scratch, implementing a robust user management system with JWT-based authentication and Joi validation.
- Designed and built secure withdrawal and deposit functionalities, storing transaction data in MongoDB using Mongoose queries.
- Created and integrated staking purchase plans and swap wallet transfer features to boost user engagement and platform functionality.
- Developed and optimized RESTful APIs for both admin and user interfaces, ensuring high performance, security, and a seamless user experience.

BOOKINGFLIX

Vue-JS, Vuex ,Bootstrap

Duration: 10 month

Bookingflix is an event booking platform allowing users to reserve seats based on date, time, and seat arrangement, supporting both hourly and daily bookings.

- Developed an event booking interface within the admin dashboard to streamline backend operations and improve overall efficiency.
- Created an interactive seat arrangement system with real-time selection and integrated bucket timing logic for optimized scheduling.
- Designed and implemented a dynamic, user-friendly calendar interface to enable seamless booking experiences.
- Integrated secure payment functionalities and ensured fully mobile-responsive UI designs to enhance accessibility across all devices.

RESPONSIVE UI DESIGN & FRONTEND PERFORMANCE OPTIMIZATION

<https://poweredbygreenbox.com/>, <https://abhadley.com/>, <https://www.wesbarvanquip.com.au/>,
<https://hivekids.com.au/>, <https://leanraqa.com/>, <https://covertlawenforcement.com/>,
<https://northernutahglass.com/>

- Designed and developed fully responsive UI pages for the websites, ensuring seamless experience across all screen sizes.
- Utilized LT Browser to test and validate layouts, spacing, and responsiveness on various devices and resolutions.

- Ensured consistent design, optimized spacing, and cross-device compatibility to enhance user experience.
- Reviewed performance metrics using PageSpeed Insights and GTmetrix, identifying key issues affecting load time and SEO.
- Optimized assets by converting images to WebP, minifying CSS/JS, resizing banners, and implementing lazy loading.
- Improved page performance by deferring non-critical JavaScript and preloading critical CSS to enhance initial render speed.

Declaration

I hereby declare that the information provided above is accurate and true to the best of my knowledge. I take full responsibility for the authenticity of the details shared and am prepared to provide supporting documentation upon request.

Thanks & Regards
